How To Read Bus Route Numbers and Notes

- A '+' indicates that all branches run along that portion of the route. For example, 87+ indicates the presence of all branches: the 87, the 87A, the 87B, and the 87C.
- A '.' separates each branch in a route box where only some of the branches follow that portion of the route. For example, 87.A indicates that the 87 and the 87A are present; the 87B is not. Alternatively, 87A.B indicates the presence of the 87A and the 87B, but not the 87.
- A rectangular box indicates a route end point or a branch of a route end point.
- A pointed box is angled to show the direction of travel.
- A yellow rectangular box indicates the end point of an express route or the end point of an express branch of a route. Note that route lines are not shown for express branches on regular routes.
- A yellow pointed box shows the direction of travel on Express and Rocket routes.

Subway Strip Maps Explanation

All TTC surface routes (except route 99) connect with the subway system. Specific connections for all surface routes and branches of routes are shown on the Subway Strip Maps to the right and below.

⊕ indicates a transfer is required to connect between the subway system and these routes.

A purple background indicates a GTA PASS or additional fare is required to connect between subway system and these routes.
